Article 5 The Committee on Water Board submitted the following Report.
Pursuant to a vote of the town at its Annual Meeting in March 1916 the Town Moderator appointed the undersigned a committee to examine the charter of the Methuen Water Company, and report to the town relative to the advisability of having changes made in the provisions thereof to enable the citizens of the town by vote to require such changes in the financial administration of the Water department as the citizens deemed wise. Your committee has met and examined the said charter and submits the following report.

The charter of the Methuen Water Company, is found in Chapter 310 of the Acts of 1892. It is provided in said charter that the town may take by purchase or otherwise the franchise corporate property and all rights and privileges of the corporation created by the said act and your committee understands that the town has exercised this power. In section 14 of said Act it is provided that if the Town so acquires the corporate rights and franchise "all the authority granted to the said town by this act, and not otherwise specially provided for, shall be vested in a board of water commissioners (elected by town voters) who shall be subject, however, to such instructions, rules and regulations as said town may impose by its vote. It is clear therefore, that the town may impose such rules and regulations regarding the financial administration of the water department as it desires.

Your Committee recommends that the town voters require the Water Commissioners in common with other departments, to submit an estimate each year of the necessary expenditures for the ensuing year and ask for an appropriation for their department. The water rates collected would be paid directly into the town treasury and the water commissioners would confine their expenditure within the limits of the amount appropriated by the town for their department.

Your committee further recommends that instead of appropriating a lump sum to cover all the expenditures of the water commissioners, the town make an appropriation for each class of expenditures which the water commissioners may be called upon to make, that is a certain sum, for the commissioners salary another sum to care for the sinking fund, and a further sum for maintenance and repairs.

Your committee has ascertained that this system has been adopted by other Massachusetts towns and has the sanction and recommendation of Mr. Gettemy, the Director of the State Bureau of Statistics.

Your committee understands that at present the water Commissioners are bonded with some surety company in the sum of five thousand dollars apiece. In view of the fact that the Commissioners in their charge in the sinking fund securities approximating

one hundred thousand dollars in value, your committee recommends that the amount of their surety bonds be increased so that the total bonds of the three commissioners will approximate fifty thousand dollars.

Your committee has been informed that the Water Commissioners have on various occasions removed the securities constituting the sinking fund from the bank to their office in the Town house and have retained said securities in their office for varying periods in some cases overnight.

Your committee condemns this practice as unsafe and unwise and in view of the fact that it is not necessary that the securities be taken from the bank for any purpose recommends the adoption of the following regulations regarding the handling and custody of the securities in the hands of the Commissioners.

1. All bonds notes and securities of whatever description constituting the sinking fund for the Methuen Water loan, shall be kept in the safe deposit vault of the Methuen National Bank.
2. The officials and employees of the Methuen National Bank shall not deliver the box or boxes containing aforesaid bonds notes or securities to anyone unless at least two of the water commissioners and the town auditor are present.
3. The aforesaid bonds, notes, and securities shall not be taken from the premises of the Methuen National Bank.

Respectfully submitted,

The above report was accepted and it was unanimously voted that the regulations recommended by the Committee be adopted.

A report of the planning board was made by Mr. Huntress and was accepted. The following was the report.

To the citizens of Methuen.

The planning board as elected by you was organized with A. S. Huntress as chairman and Samuel Joy as clerk. Its chief activities have been in connection with the Selectmen as the "Board of Improvements." This board gave several hearings on location of bill boards, viewed sites and suggested changes in locations which would make them less objectionable.

We found on the whole that the advertising companies were ready to cooperate with us in the matter for betterment of conditions. The matter of building line restrictions has been

taken up and established in a few necessary cases. This is a matter the Board expects to give more attention to during the coming year. We would ask the co-operation of land owners contemplating cutting up and developing their land, laying out new streets etc. If more attention had been given to this and the building laws in years past, the town would have fewer of the sore spots than it now has. We have made some inquiries regarding the working of the building laws and find that on the whole they are working as a benefit to the town. The opposition that was expected from the foreign element in the outlying districts has not materialized, in fact we find that when they know what the law requires they will take as much pride in the better conditions as their neighbors. There has been some dissatisfaction in the Arlington District regarding three deckers and distance to side lines, but as we do not know the facts in particular cases we cannot make recommendations at this time. We would suggest that the articles in the Warrant calling for changes in the building laws be referred to the Board of Improvements for a hearing, and that they recommend a course of action to the adjourned town meeting.

The water supply and the betterment of the service is a vital question at the present time, we think that the solution can only be got at by a friendly co-operation between the water board and the citizens of Methuen. This has been started by the real estate owners association through their executive committee who have met with the water board and suggested a system of publicity for the instruction of the citizens at large on the conditions and problems that confront them. We would suggest that other departments follow up this idea and meet with the planning board, the executive committee of the real estate owners association, the Town Meeting members, or any other body of citizens from time to time for a frank discussion of Town affairs. We feel that the Town meeting members can do much toward bringing the widely scattered districts together on a common ground for the best interest of the Town.

On the annexation questions the board wish to be recorded as opposed to giving up any part of Methuen.

The meeting was called to order at 7-30 P.M. by the Moderator, sixty town meeting members being present by actual count by the Moderator.

Article 1 Water Supply

The Special Committee on Water Supply reported verbally, the substance of their report being, that for immediate needs a temporary dam might be built across the brook near the pumping station which would probably be sufficient to supply all needs for the present year, but they recommended an investigation of the cost and feasibility of taking water from Island Pond in Hampstead N.H., and any other available source of supply, and that an appropriation

be made to defray the cost of necessary surveys. It was voted to appropriate Three Thousand dollars for the purpose of carrying out the recommendation of the Committee and that the money be expended under their direction.

A vote of thanks was tendered the Committee for their services in the matter.

Article 2 **Salary of Selectmen**

Voted – to fix the salary of the Chairman of the Selectmen at Five Hundred Dollars per annum, and the salaries of the other two members at four hundred dollars, each, and that four hundred dollars be appropriated in addition to the sum already appropriated for that purpose.

Article 3 Voted – by a unanimous vote, to appropriate the sum of ten thousand five hundred dollars for purchasing land, constructing a new fire house, and purchasing apparatus and equipment for east part of town. Also that a committee consisting of the Fire Engineers and three persons appointed by the Moderator be authorized to carry out this vote. The Chair appointed William Forbes, Frank Sherman, and Edward Riley on committee.

Article 4 **Seizure of Land**

Voted to take in fee simple, for fire department purposes a certain plot of land owned by Carl S. Lippold and described as follows; - Situated at fork of Swan and East St., from a point at intersection of Swan and East St.; about 140 feet west on Swan street, thence at right angles, to line bisecting angle of two streets; about 58 feet, thence at right angles to East street about 58 feet; thence about 140 feet on East Street to point of beginning, containing 8000 square feet more or less.

Article 5 **Loan**

Voted by a unanimous vote, that for the purpose of raising money to pay for land and construction of a new fire house in the east part of the town, and for purchasing apparatus and equipment for the same, the Town Treasurer is hereby directed to issue and sell notes or bonds of the Town, coupon in form to the amount of Ten Thousand five hundred dollars, bearing interest at a rate not to exceed five per cent per annum and payable in annual installments of one thousand dollars each, for ten years, beginning in one year from the date of said notes or bonds, and continuing for ten successive years, and five hundred dollars in eleven years, and the proceeds of said notes or bonds are hereby appropriated for the purposes aforesaid.

Article 6 **Sale of School Houses**

Voted to authorize the Selectmen to sell the land and building of the Marsh corner now used as a school house, and also the building at Howe Street and Grosvenor's Corner.

Article 7 **Pay for teams**

Voted that the compensation paid for double teams be left to the discretion of the

Highway Surveyor.

Article 8 **Forest Fires**

Voted, to appropriate the sum of one hundred and fifty dollars for the prevention of forest fires.

Article 9 Voted, to install 33 hundred feet of sewer on Jackson Street, and appropriate the sum of six thousand dollars for the same.

Article 10 **By Law - Building Lots**

Under the provisions of Chapter 494 of the Acts of 1913 the following By Law is hereby adopted, carried by a unanimous vote.

All persons, corporations, or associations desiring to lay out within the limits of the town, land in lots for dwellings or other purposes shall prior to such layout, submit to the Planning Board plans showing the proposed layout location, number and respective size of lots, location, width, and grade of streets, and sidewalks, to be approved by said Board which is hereby authorized and empowered to specify the minimum size of lots, minimum width and grade of streets and sidewalks, location and construction, including material and style of streets, sidewalks, sewers, water pipes, wires and poles for any purpose.

Any person, corporation or association who shall neglect to submit such plan to said Board, as required by this By-Law, shall forfeit and pay for each and every offense a sum not more than fifty dollars, and any person, corporation or association which shall neglect to comply with any specification or order of said Board, made in accordance with the provisions of this By Law, shall be punished by a fine not more than twenty dollars, for each and every day such neglect to comply therewith shall continue.

(Disapproved by Attorney General)

Article 11 **Building Laws**

The Board of Improvements made the following Report, which was adopted.

Methuen, Mass., May 23, 1917

The Board of Improvements after having heard the arguments of the petitioners, find as follows:-

That under our present ordinance three tenement houses can be built in Methuen by conforming to the requirements, that is by making exterior walls of incombustible materials, and plastering cellar ceiling. This means a slight increase in cost over the ordinary type which we think is warranted by the congestion of the district under discussion.

We find that two buildings can be built on lots 50 x 120, but provided requirements as to yards and distances to lot lines are carried out. This will allow for two buildings with four room tenements, and these may be built three stories high as previously stated. By careful planning it might be possible to put two five room tenements on this lot by building

in a semi detached form. We would recommend that no change be made in distance of the side lines of lot which is now five feet.

The petitions stated that Article 17 to revise the building laws was intended to cover only the previous items and we feel that we are working for the best interests of the Town in recommending that this be passed over.
